Data Source: Behavioral Risk Factor Surveillance System

Based on households who reported they had ever tested for radon and had found radon levels above normal.

% = Weighted percentage of households

LCL= Lower 95% confidence level of the weighted percentage

UCL= Upper 95% confidence level of the weighted percentage

DNR: Data not reliable. Data are not shown if the unweighted sample size for the denominator was < 50 or the Confidence Interval half-width was > 10, as they do not meet standards for statistical reliability.

NSD: non-sufficient data, data is suppressed to protect privacy
